Top Skills

Low-Level Design
Deep Learning
Supervised Learning

Certifications

Ethics in Engineering
Introduction to Python Fundamentals

Pritam Tung

Machine Learning Engineer | GenAI & RAG & Agentic-AI | Building Real-World AI Applications | TensorFlow • LangChain • LangGraph • Python • DSA

Purba Medinipur, West Bengal, India

Summary

I am a Computer Science student and a passionate developer focused on building the 'complete' application—combining robust Full-Stack development with the power of Deep Learning. My technical journey is driven by a love for problem-solving, whether I am architecting a scalable web app using the MERN stack (MongoDB, Express, React, Node.js) or training neural networks to solve complex data challenges. I enjoy bridging the gap between clean user interfaces and intelligent backend models. What I bring to the table: Web Development: Crafting responsive and dynamic applications using React.js and Node.js. AI & Machine Learning: Implementing Deep Learning models and exploring MLOps for real-world deployment. Problem Solving: A strong foundation in Data Structures and Algorithms (DSA) to write efficient, optimized code. Tech Stack: Python, JavaScript, Flask, MongoDB, and Git. I am always looking for opportunities to collaborate on innovative projects that push the boundaries of what web technology and AI can achieve together. Education

Hooghly Engineering and Technology College

Bachelor's of Technology , Computer Science and engineering · (May 2023 - May 2027)

Internshala Trainings

Machine learning with AI Certification Course, Machine learning with AI

Tulia Sitala model high school

Higher secondary, Science · (April 2021 - April 2023)

Tulia High School

· (2021 - 2023)

Hooghly Engineering and Technology College

Bachelor of Technology, Computational Science · (2023)
